

12-Hour Challenge: College Event Portal

INTERNSHIP ASSIGNMENT BRIEF

TARGET AUDIENCE

2nd – 3rd Year B.Tech Students

MODE

Individual Submission

DURATION

12 Hours

TECH STACK

React / Next.js + Backend + Database

01 Overview

Your task is to design and develop a modern College Event Management Portal capable of handling registrations, event discovery, schedules, announcements, and administration.

The objective is not to create a pixel-perfect clone of existing systems but to demonstrate your ability to build scalable, maintainable, and user-friendly full-stack applications under a strict deadline.

You are encouraged to make thoughtful engineering decisions and implement as many features as possible while maintaining clean code quality.

02 Core Requirements

1. Authentication

- Student Login
- Registration
- Secure Authentication
- Logout
- Protected Routes

2. Student Dashboard

Students should be able to

- View upcoming events
- Register for events
- View registered events
- Cancel registration
- View announcements
- Responsive dashboard

3. Event Listing

Each event should contain

- Banner / Image
- Event Name & Description
- Date, Time & Venue
- Category
- Registration Deadline
- Seats Available & Register Button

4. Admin Panel

Admin should be able to

- Create events
- Edit events
- Delete events
- View registrations
- Publish announcements

05 Database Design

Design and manage a relational or non-relational schema covering the following entities. Use any SQL or NoSQL database of your choice.

- Users
- Events
- Registrations
- Announcements

06 Bonus Features (Highly Preferred)

Bonus Ideas

- QR Code Registration
- Email Confirmations
- Search & Filters
- Dark Mode
- Event Categories
- User Profile
- Analytics Dashboard
- Calendar View
- Image Uploads
- Pagination
- Loading Skeletons
- Responsive Mobile UI
- Docker Deployment
- Live Deployment

07 Evaluation Criteria

Criteria	Weight
UI / UX Design	20%
Backend Architecture	20%
Database Design	15%
Code Quality	15%
Feature Completion	20%
Innovation	10%
